

Proper Manual Dishwashing Procedures for Three Compartment Sinks

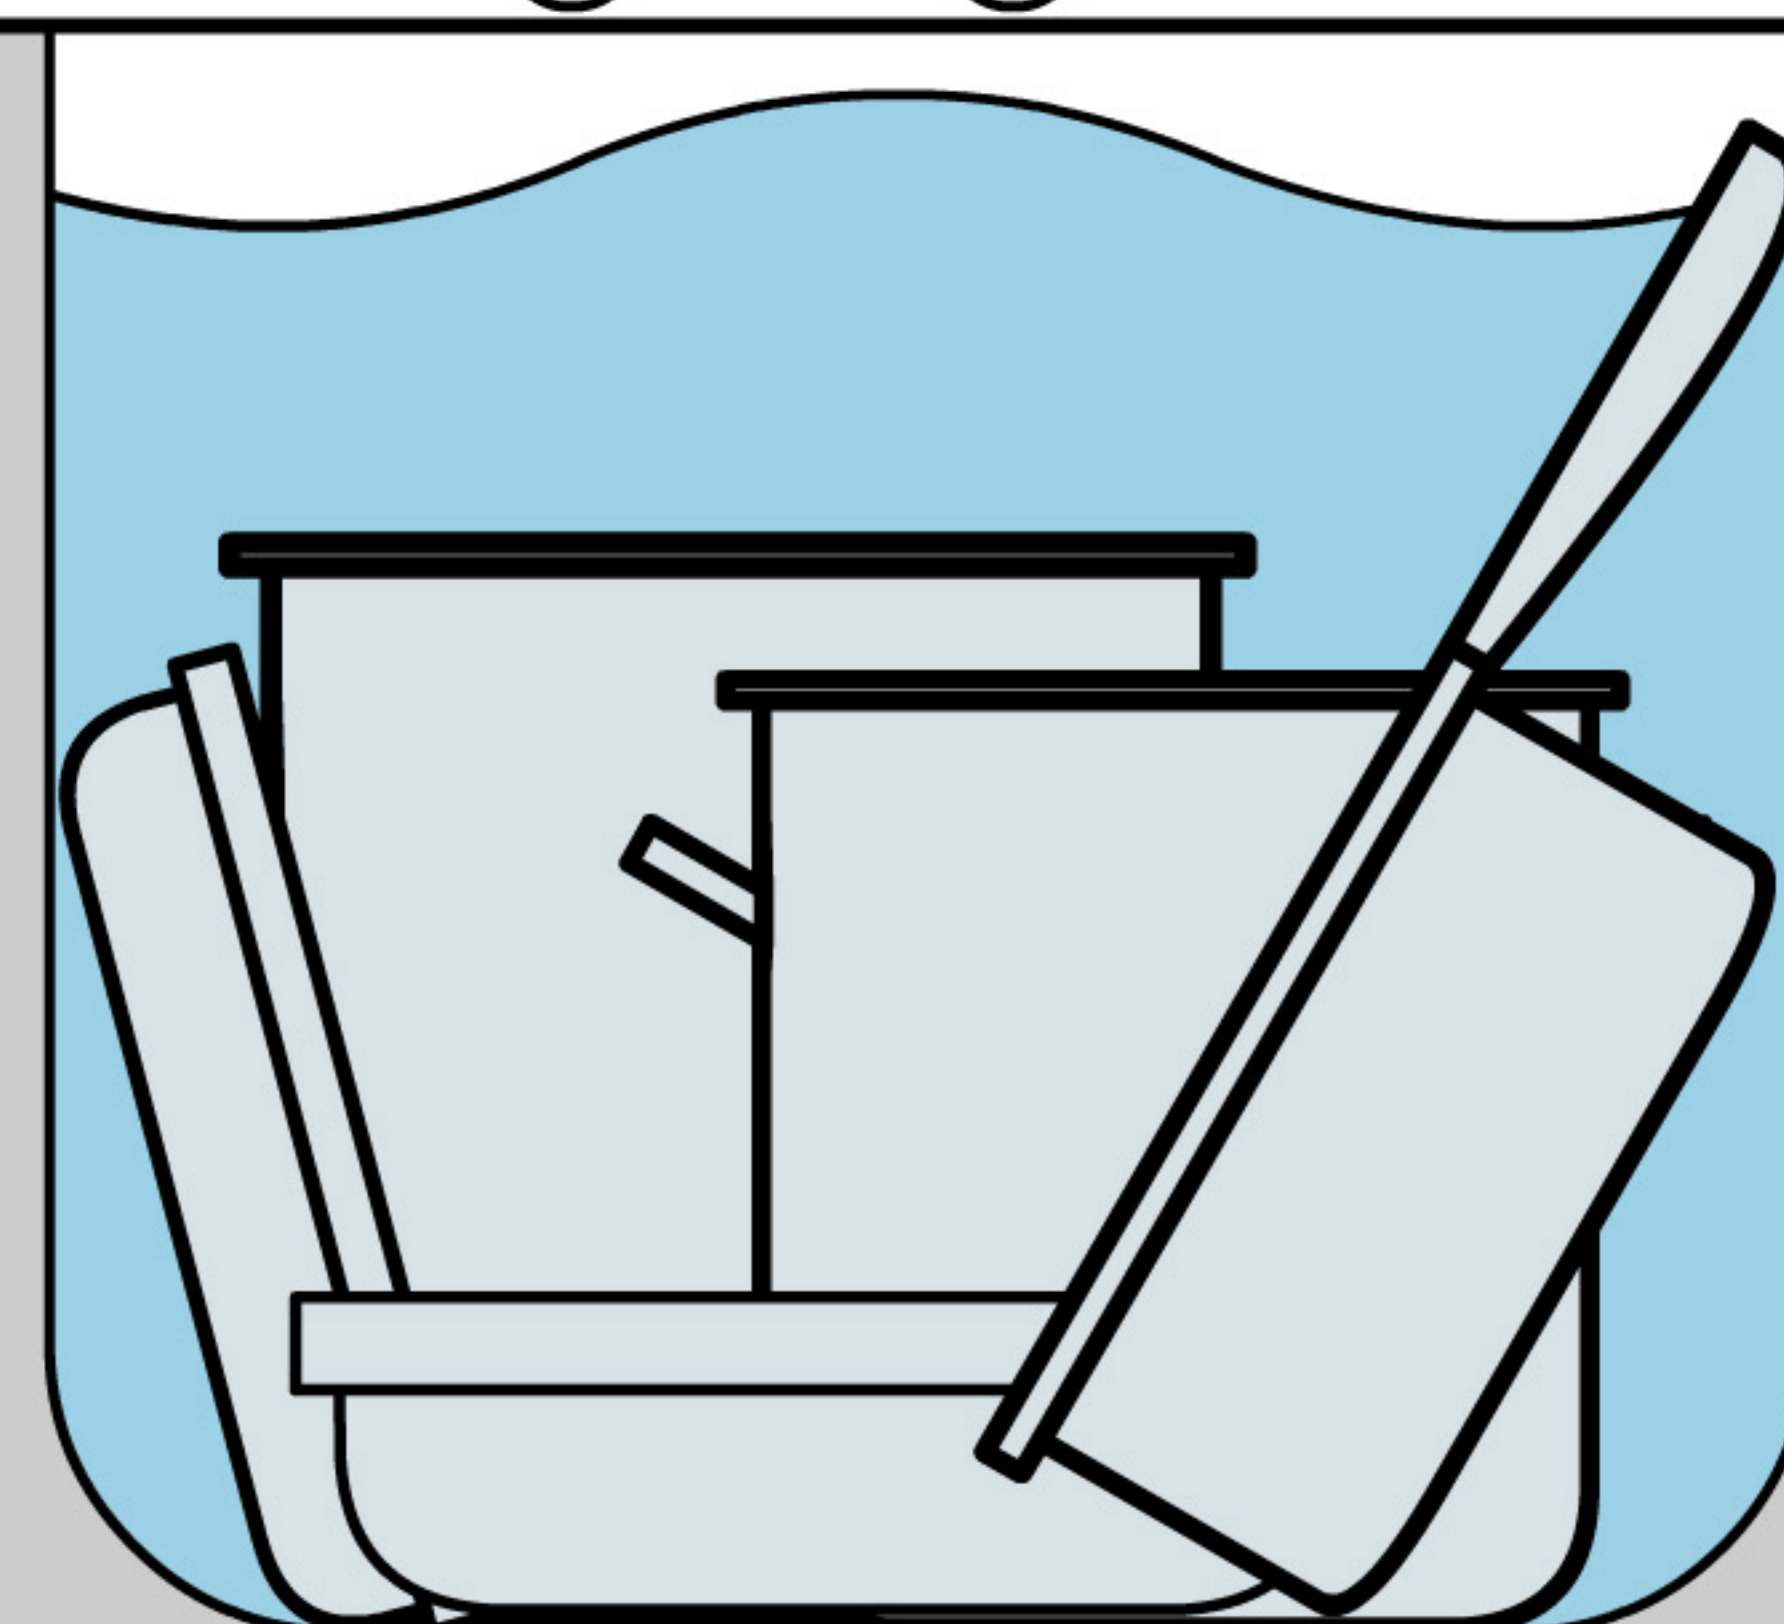

STEP 1

Rinse, scrape or
soak

STEP 2

Wash
(Soap & Water)

STEP 3

Rinse
(Clean Water)

STEP 4

Sanitize
(Sanitizer & Water)

STEP 5

Air-dry

Sanitizing:

1. Must have compatible test kit available to verify concentration of the sanitizer being used.
2. May use chlorine at 50-99 ppm.
3. May use quaternary ammonia at manufacturer's specifications, typically 200-400 ppm.
4. May use iodine at 12.5-25 ppm.
